SICAV ODDO BHF – METROPOLE FRONTIERE EUROPE

(hereinafter the “Sub-fund”)

A sub-fund of SICAV ODDO BHF (hereinafter the “SICAV”), managed by ODDO BHF Asset Management SAS

ISIN: A – FR0007085808 – EUR – Accumulation

OBJECTIVES AND INVESTMENT POLICY

The Sub-fund seeks to outperform its benchmark, the STOXX Europe Large 200 with net dividends reinvested, through active management over a five-year period.

The Sub-fund’s strategy is to rigorously select discounted stocks. These are essentially equities – all caps combined – of European Union countries, which the market may “rediscover”. Investment in European Union equities shall be at least 75%, and exposure at least 60%. Investments are predominantly made in Central European countries that have joined the European Union since May 2004.

When not invested in equities, up to 10% of the Sub-fund’s assets may be invested in units or shares of UCITS, including other UCITS managed by the ODDO BHF group, and up to 15% in money market products.

The Sub-fund may use derivatives to expose the Sub-fund’s assets to, or hedge them against, an index or specific security.

The derivatives that may be used are restricted to listed options and futures with a maturity of no more than two years.

The Sub-fund may not use special derivatives such as those traded over-the-counter.

The Sub-fund may not be appropriate for investors who plan to withdraw their money within five years.

The A share class accumulates its income.

Recommended investment horizon: 5 years

Subscription and redemption requests are centralised until 12:00 CET/CEST every day, and executed on the basis of the next net asset value, which will be calculated using that day’s closing prices, or at an unknown price.

RISK AND REWARD PROFILE

Historical data, such as is used to calculate the synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-fund. The risk profile is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment. The capital initially invested is not guaranteed.

Why is the Sub-fund placed in category 6?

The risk indicator of 6 reflects weekly volatility of between 15% and 25% over five years.

This indicator is used to measure the expected level of return and the risk to which the investment is exposed.

Category 1 does not mean a risk-free investment.

The capital invested is not guaranteed.

Material risks to the Sub-fund that are not taken into account in the indicator:

Liquidity risk: Where a not-insignificant portion of the investments is held in financial instruments for which liquidity may be poor in certain circumstances.

Please refer to the prospectus for more information on risks.

If one of these risks were to materialise, the Sub-fund’s net asset value may fall.
